

FIBERLOCK TECHNOLOGIES

Grip-Tack (6408)

Grip-Tack is a high-solids, water-based multipurpose lockdown/adhesive which captures and seals residual contaminants present before, during, and after demolition or removal projects. Its unique formulation provides a soft, tacky, flexible membrane which locks down asbestos fibers, lead paint chips and dust to insure final clearance after the removal of lead and/or asbestos. The sticky finish traps lead dust and airborne fibers making it ideal for overcoating lead paint or asbestos prior to their removal or demolition. This product is also suitable for use as a lead paint adhesive primer for use over high gloss surfaces containing lead paint.

Powerstone™ Plus (5489)

Powerstone Plus is a clear multipurpose waterborne acrylic sealer that provides non-yellowing protection for a variety of interior and exterior surfaces. This highly alkali resistant weatherproof coating resists household cleaners, gasoline, oil, weathering and efflorescence. Powerstone Plus seals brick, block and poured concrete to reduce water penetration and prevent surface dusting and staining. Powerstone Plus can be applied to both horizontal and vertical surfaces and is ideal for use on concrete, brick, slate, and stucco. Clean metal surfaces of copper and aluminum can be finished with Powerstone Plus to prevent surface oxidation and discoloration.

Powerblock (5450)

Power Block is a quick drying, high performance 100% acrylic latex coating specifically designed to prime stained or water damaged surfaces. This stain blocking primer provides exceptional adhesion and stain blocking properties and may be used on interior or exterior surfaces to prevent most bleeding type stains, seal porous surfaces and provide adhesion to hard and glossy surfaces. It is environmentally friendly, free of lead, mercury, and formaldehyde hazards and complies with all federal and state VOS/VOC requirements.

Power Rust Stop (5493)

Power Rust Stop is a rust inhibiting 100% acrylic latex metal primer for use on ferrous metal, galvanized metal and other surfaces exposed to general industrial and atmospheric conditions. Power Rust Stop has excellent solvent and water resistance, and excellent resistance to most alkalis, detergents and mild acids.

Power Rust Stop does not contain flammable solvents commonly found in other rust inhibiting primers; it is a low odor coating, and dries quickly for fast re-coatability.
