Asbestos abatement activities must be performed in accordance with all applicable regulations that may be present in the air. Protective clothing should be worn.

**SETTING TIME**

Wet-Wrap ‘N’ Seal will set in 2-4 minutes. Setting time is measured from the point when the product is immersed to the point when it can no longer be molded. Increasing or decreasing the temparate of the immersion water by 9°F (5°C) will reduce or extend the setting time by approximately 15 seconds.

**CLEANUP**

Tools and dripings should be cleaned with warm soapy water before adhesive dries. Dispose of waste according to all existing local, state and federal regulations.

**PRECAUTIONS**

Store in a dry place. Approved respirators must be used to prevent inhalation of asbestos fibers that may be present in the air. Protective clothing should be worn.

Asbestos abatement activities must be performed in accordance with all applicable regulations including EPA, OSHA, Federal, State and Local. For more information always contact the appropriate agencies prior to beginning any abatement project.

For additional information check Material Safety Data Sheet (MSDS) or Product Data Sheet (PDS) available online at www.serpisystems.com.

**PRODUCT APPLICATION**

Water in pail must be clean at all times. This product is a plaster of paris and synthetic resin combination. Use of this product will cause the dry material to set in 2-4 minutes. Setting time is measured from the point when the material is immersed to the point when it can no longer be molded. Increasing or decreasing the temperature of the immersion water by 9°F (5°C) will reduce or extend the setting time by approximately 15 seconds.

**6" Wide**

- Applies quickly and easily
- Free of fumes and odors
- Permanently shaped
- High strength
- Pre-cut to 9 ft (2.7m) lengths
- One-step installation
- Saves time and labor
- No maintenance
- No waste
- No special skills or tools required

For Professional Use Only

2433-U

6"x9’ (40 Rolls)
