Barrier Coat II is a water-based coating which forms a barrier between lead-based paint and the environment. It is a high-solids coating formulated to coat surfaces, seal, and act as a barrier to prevent the migration of surface moisture, dust, and aesthetics while preserving historic details. Barrier Coat II contains SerpiLoc, a bitter-tasting ingredient to discourage oral contact and aid in the assessment by a licensed lead assessment professional. For more information, consult a physician. Remove contaminated clothing and wash before reuse.

If breathing has stopped, give artificial respiration. If breathing has not restarted, make sure the airway is clear. If breathing does not restart, give mouth-to-mouth ventilation. If breathing does not restart, check for pulse. If pulse is present, do CPR. If pulse is not present, CPR should be continued. If using an AED, follow the directions of the AED. Continue CPR until the victim is breathing or直到医疗人员接手急救。|

LA PEAU: laver abondamment à l'eau et au savon.|En cas d'irritation cutanée, consulter un médecin.|Traitement spécifique (voir les conseils sur cette étiquette).|Laver et rincer les yeux en cas d'exposition aux yeux.|Éviter le rejet dans l'environnement.|En cas d'ingestion, laver le fortrexant anti-ingestant à long terme.

H317 - May cause an allergic skin reaction.
