**APPLICATION TOOLS**  
Brush: Synthetic, nylon or polyester bristle  
Roller: Synthetic fiber 3/8" nap or longer  
Spray: .015 to .021 tip @ 2300-2700 P.S.I.

**SURFACE PREPARATION**  
Apply Power Block with brush, roller or airless spray equipment. Do not add solvents, oils or colors in 1/4 oz. or less with any other paint types. Consult all related local, state and federal regulations regarding work practices and personal protection to be used prior to the application of Power Block. Power Block seals many common stains such as rust, smoke stains, water stains, grease spots, cedar and redwood bleed. Before priming stained areas, remove as much of the stain as possible by washing, sanding or scraping. Some stains may require two coats. If an active stain discolors this primer, apply the finish coat to a small area to see if the stain is “locked” into the primer.

**CLEANUP**  
Clean tools and drippings with warm soapy water and free of rust, grease, oil, mildew, loose paint, or other water-soluble paints. Fill nicks, holes and voids removed. Do not apply over calcimine, casein or non-combustible. Stir thoroughly. Do not mix with other paint types. Consult all related local, state and federal regulations regarding work practices and personal protection to be used prior to the application of Power Block. Power Block seals many common stains such as rust, smoke stains, water stains, grease spots, cedar and redwood bleed. Before priming stained areas, remove as much of the stain as possible by washing, sanding or scraping. Some stains may require two coats. If an active stain discolors this primer, apply the finish coat to a small area to see if the stain is “locked” into the primer.

**COVERAGE**  
Power Block is a white, quick drying, high performance 100% acrylic latex coating specifically designed for prime stained or water damaged surfaces. Power Block can be used on interior or exterior surfaces to prevent most bleeding type stains, seal porous surfaces and provide adhesion to hard and glossy surfaces.

**SUPPORT**  
For Technical Information call 800.342.3755

**RECOAT**  
To Recoat: 1 hour

**STORAGE**  
Store between 40°F (4.5°C) and 90°F. (32°C) Close container after each use.

**SAFETY DATA SHEET**

**STATEMENTS**

H331 - Susceptible of causing cancer.
H360 - May damage fertility or the unborn child.
H373 - Harmful to aquatic life with long lasting effects.

**PHRASES**
