Fiberlock PM is a pre-mixed “lockdown” sealing treatment for microscopic residual fibers present after the removal of Asbestos Containing Material (ACM). Available in white, blue or grey, Fiberlock PM is a ready-to-use, Class A fire-rated coating that provides a flexible barrier over residual fibers to ensure final air clearance. Fiberlock PM is UL® classified for use as an air tightening system for use with the “Encapsulant Materials” section of the UL directory, and is compatible with leading brands of flooring adhesives. Fiberlock PM is a water-based seal that employs advanced 100% acrylic resin technology to extend the life expectancy of airless spray equipment.

**SURFACE PREPARATION**

Warning! If you scrape, sand, or remove old paint from any surface, you may release lead dust. Lead Store: EXPOSURE TO LEAD CAN CAUSE SERIOUS HEALTH HARM, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD AVOID EXPOSURE. Wear a NIOSH approved respirator to control lead exposure. Carefully clean up with a non-combustible. Approved respirators must be used to prevent inhalation of asbestos fibers that may be present in the air. Protective clothing should be worn. Asbestos abatement activities must be performed in accordance with all applicable regulations including EPA, OSHA, Federal, State and Local. For more information always contact the appropriate agencies EPA, OSHA, Federal, State and Local. For more information check Safety Data Sheet (SDS) or Product Data Sheet available online at www.fiberlock.com.

**PRODUCT APPLICATION**

Spray: .015-.021 tip @ 1700-3000 P.S.I

Apply Fiberlock PM with airless spray equipment. Use Lockdown: Not less than 500 sq. ft. per gallon.

**SURFACE SEALANT**

- Lockdown: Not less than 500 sq. ft. per gallon.

**POST-REMOVAL SURFACE SEALANT**

Lock Down Residual Asbestos Fibers after Removal of ACM

- UL classified
- Class A fire rated
- Ideal for use as a pulldown
- Compatible with many floor adhesives
- Clear

**NET CONTENTS:** 5 Gallons

**For Professional Use Only**

**WARNING:**

Fiberlock PM is a water based seal that employs advanced 100% acrylic resin technology to extend the life expectancy of airless spray equipment.

1. Apply Fiberlock PM with airless spray equipment. Use Lockdown: Not less than 500 sq. ft. per gallon.
2. Then apply Fiberset PM to all asbestos removal is mandatory on every project. Prior to post-removal air monitoring, apply one coat to all exposed surfaces.
3. Fiberlock PM has been accepted as part of a UL Classified Fireproofing System for use with Retro-Guard® manufactured by WR Grace. Coverage should not be less than 500 sq. ft. per gallon on smooth surfaces.

**FULL DOWN BY MISTING**

Misting the contaminated air is an effective technique prior to performing air monitoring. To pull down free-floating asbestos fibers, misting water should be used in the center of the room and hold the spray gun as close to the ceiling as possible. A mist should be sprayed parallel to the ceiling in every direction or in a circle. Apply one coat to the surface, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD CAN CAUSE SERIOUS HEALTH HARM, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD AVOID EXPOSURE. Wear a NIOSH approved respirator to control lead exposure. Carefully clean up with a non-combustible. Approved respirators must be used to prevent inhalation of asbestos fibers that may be present in the air. Protective clothing should be worn. Asbestos abatement activities must be performed in accordance with all applicable regulations including EPA, OSHA, Federal, State and Local. For more information always contact the appropriate agencies EPA, OSHA, Federal, State and Local. For more information check Safety Data Sheet (SDS) or Product Data Sheet available online at www.fiberlock.com.
