PRODUCT DATA SHEET

DUCT DEFENDER
HVAC CLEANING BIOCIDE
8323-1

EPA REGISTERED TO INHIBIT GROWTH INSIDE HVAC SYSTEMS

Fiberlock Duct Defender is designed to be used as one component of a comprehensive HVAC and duct maintenance program. The purpose of such a program is to assure that the HVAC system and ducts function in the manner they were designed to, remain free from odor-causing mold and other microbial growth and other contamination. This Product should only be used in only those cases where visible microbial growth has been detected in the system and then only after removing that growth and identifying and correcting the conditions that led to that growth. It may also be used to inhibit growth on surfaces that normally become wet during operation of the system. These normally include (but are not limited to) evaporator coils, uninsulated piping, condensate drain pans, drain lines, silicon caulks, mist eliminators and cabinet housing components subject to wetting by mist or carryover of water.

- **1-Step cleaner, disinfectant, deodorizer**
- **Fragrance free / Non-irritant**
- **EPA registered disinfectant/sanitizer for HVAC equipment surfaces**
- **EPA registered to inhibit growth inside HVAC systems**
- **No human health risks/non-hazardous formula**
- **Eliminates odor caused by bacteria and fungi**
- **Easy application with fogging or electrostatic spraying By reducing allergens in HVAC system**

FOR USE WITH:

- Fan coil units
- Humidifiers both desiccant and refrigerated
- Condensate drain pans
- Air handlers
- Unlined sheet metal ducts
- Flexible air ducts fabricated of metal or plastic

Fiberlock 8323-1 Duct Defender 1 gallon

Benefits of Duct Cleaning

Improved Indoor Air Quality: Cleaning removes built-up contaminants providing relief for occupants with allergies, asthma, or other respiratory conditions.

Enhanced System Efficiency: Removal of accumulated debris can improve airflow allowing the HVAC system to work more efficiently.

Odor Elimination: Musty or stale smells caused by mold, pets, and food preparation can be trapped in duct dust. A professional cleaning neutralizes these odors.

HMIS Hazard Ratings	
HEALTH	0
FLAMMABILITY	0
REACTIVITY	0
