TINTABLE with 50% of the tinting formula and adjust as necessary.

Spray: .021 to .025 tip @ 2000-2800 P.S.I.
Roller: Synthetic fiber 3/8” nap or longer
Brush: Synthetic, nylon or polyester bristle equipment.

APPLICATION TOOLS

Clean tools and drippings with warm soapy water before IAQ 6000HD dries. The coating and any contaminated digging material should be thoroughly air dried and collected into drums. The drums should be sealed and labelled and land-filled or incinerated according to local, regional and national regulations.

PRODUCT APPLICATION

IAQ 6000HD is a white, tintable, high-build coating for use in high humidity conditions and conditions where condensation may occur. IAQ 6000HD contains fungistatic agent to resist mold growth on the dry coating surface. IAQ 6000HD is a durable and flexible 100% acrylic water-based flat coating. IAQ 6000HD is designed for use on non-porous and semiporous building materials including, gypsum wallboard, oriented strand board (OSB), wood framing timbers, plywood, masonry block, and many other structural surfaces where a flexible, high-build mold resistant coating is necessary.

APPLICATION TOOLS

IAQ 6000HD may be applied by any type of airless spray or conventional spray. IAQ 6000HD can be applied by brush or roller. IAQ 6000HD is a durable and flexible 100% acrylic water-based flat coating. IAQ 6000HD is designed for use on non-porous and semiporous building materials including, gypsum wallboard, oriented strand board (OSB), wood framing timbers, plywood, masonry block, and many other structural surfaces where a flexible, high-build mold resistant coating is necessary.

SURFACE PREPARATION

Warning: If you scrape, sand, or remove old paint from any surface, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE. ESPECIALLY IN CHILDREN, PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. When a N95 approved respirator is not available, use any respirator that is approved by the National Institute for Occupational Safety and Health. Carefully clean up with a wet mop or HEPA vacuum. Before you start, find out how to protect yourself and your family by contacting the U.S. EPA/Lead Hotline at 1-800-424-LEAD (5323) or visit www.epa.gov/lead.

Lead based paints are poor or when surfaces are above a 11% moisture level other disease-causing organisms. Do not apply when air or food-borne or disease-causing bacteria, viruses, germs or other contaminants are present in the area to be coated. IAQ 6000HD is a white, tintable, high-build coating for use in high humidity conditions and conditions where condensation may occur. IAQ 6000HD contains fungistatic agent to resist mold growth on the dry coating surface.

Heavy Duty Mold Resistant Coating*

Class A fire rated

Coverage

IAQ 6000HD is a white, tintable, high-build coating for use during new building construction. IAQ 6000HD contains fungistatic agent to resist mold growth on the dry coating surface. IAQ 6000HD is a durable and flexible 100% acrylic water-based flat coating. IAQ 6000HD is designed for use on non-porous and semiporous building materials including, gypsum wallboard, oriented strand board (OSB), wood framing timbers, plywood, masonry block, and many other structural surfaces where a flexible, high-build mold resistant coating is necessary.

Precautions

N95 - FFP1 or higher respiratory protection
H241 - Toxic to aquatic life with long lasting effects.
H319 - Causes serious eye irritation.
H351 - Susceptible of causing cancer.
H321 - Causes damage to organs through prolonged or repeated exposure.
H361 - Detects aquatic life with long lasting effects.

To achieve IAQ 6000HD bond strength with the coating, a denser surface is desired.

MASONRY BLOCK – Apply one coat of IAQ 3000 block filler if primer.
WOOD – Seal knots and stains with IAQ 5000 stain-blocking primer.
FERROUS METAL – Clean, then prime with IAQ 4000 rust resistant coating.
Wallboard, Sheetrock, Gypsum Board – Joint cement primer over bare sheetrock, composition board, ceiling tile and concrete. IAQ 6000HD is self-priming over bare sheetrock, composition board, ceiling tile and concrete. For additional information check Safety Data Sheet (SDS) or Product Data Sheet (PDS) available online at www.fiberlock.com.

CAUTIONS

KEEP OUT OF REACH OF CHILDREN. Do not take internally. Close container after each use. Store between 40°F (4°C) and 90°F (32°C)

IAQ 6000HD is a white, tintable, high-build coating for use during new building construction. IAQ 6000HD contains fungistatic agent to resist mold growth on the dry coating surface. IAQ 6000HD is designed for use on non-porous and semiporous building materials including, gypsum wallboard, oriented strand board (OSB), wood framing timbers, plywood, masonry block, and many other structural surfaces where a flexible, high-build mold resistant coating is necessary.

PRODUCT APPLICATION

IAQ 6000HD is supplied as a mix, but can be thinned sparingly with water (up to 1/2 pint water per gallon) for proper application consistency if necessary. Apply IAQ 6000HD generously and uniformly by brush or airless spray. Ensure that the finished surface is properly sealed. Two-coats may be required on some highly porous surfaces.

COVERAGE

Smooth Surfaces: 250-400 ft²/gal
Porous Surfaces: 100-300 ft²/gal

DRIEVING TIME @ 70°F 50% R.H
To Touch: 1-2 hours
To Dry: 8-16 hours
