FIBERLOCK IAQ 6500 is a black, mold resistant coating for professional use only. It is recommended for new structural materials to help prevent mold growth. IAQ 6500 has been tested independently and certified to prove its superior performance. IAQ 6500 has successfully passed both ASTM G-21 and ASTM D-3273 mold resistance testing with the highest scores possible. IAQ 6500 is recommended to deter mold growth on wood, plastic, wallboard, sheetmetal, concrete, masonry, black, painted metal and galvanized metal. IAQ 6500 can also be used on new structural materials to help prevent mold growth during building construction.

**Surface Preparation**

If you scrape, sand or remove old paint from any surface, you may release lead dust. USDA TOXIC EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH approved respirator with any R, P, N or HE filter. For interior application. When applying with a sprayer, wear a NIOSH approved respirator with any R, P, N or HE filter.

If conditions are poor or when surfaces are above a 15% moisture level, use a fan to speed drying and reapplication. When applying with a sprayer, wear a NIOSH approved respirator with any R, P, N or HE filter.

For additional information including Safety Data Sheet (SDS) or Product Data Sheet (PDS) available online at www.fiberlock.com.

**Product Application**

IAQ 6500 is supplied ready to use, but can be thinned sparingly with water (up to ½ pint water per gallon) for proper application consistency if necessary. Apply as a sound, evenly coated, uniform film and uniformly by brush, roller, or airless spray. Apply one coat of IAQ 6500, and ensure that the finished surface is properly sealed. To ensure that the finished surface is properly sealed, two coats may be required on some porous surfaces.

**Coverage**

Smooth Surfaces: 400-450 ft²/gal
Porous Surfaces: 200-300 ft²/gal

**Drying Time** @ 70°F 50% R.H

To Touch: 1 hour
Recoat: 4 hours

**Storage**

Store in a dry place at temperatures between 40°F (4.5°C) and 90°F (32°C). If the product feels too thick, thin sparingly with water (up to ½ pint water per gallon) for proper application consistency if necessary. Store between 40°F (4.5°C) and 90°F (32°C). Read the Safety Data Sheet for further information before use.

**Preparation**

Clean thoroughly with a detergent and water soap. For stubborn dirt, use a chemical cleaner such as VCT Stripper or a detergent. Wipe thoroughly with soap and water before applying the coating. Do not apply IAQ 6500 to sticky, dirty or greasy contamination. Clean mold stained surfaces with Advanced Perishelic Cleaner or an EPA registered antimicrobial disinfectant cleaner such as Method® All Natural Multi-Surface Cleaner. Clean mold stained surfaces with a solution of 1 part VCT Stripper to 5 parts water. IAQ 6500 is a black, mold resistant coating for professional use only. For Professional Use Only.

**Use**

Use with plenty of soap and water.; If skin irritation or rash occurs, Wash thoroughly with soap and water.; If skin irritation or rash occurs. Get medical advice/attention.; IF exposed or concerned: Get medical advice/attention.; IN CASE of exposure or suspected contamination: Consult a physician/medical specialist. For additional information including Safety Data Sheet (SDS) or Product Data Sheet (PDS) available online at www.fiberlock.com.

**Recoat**

Recoat: 4 hours

**To Touch**

To Touch: 1 hour

**Note**

6500 is a black, mold resistant coating for professionals who use that contains a fungistatic agent to resist mold growth on the dry coating surface. IAQ 6500 is a durable, flexible, and permeable 100% acrylic water-based semi-gloss coating that can withstand the moist, humid conditions present in any room. IAQ 6500 is recommended to deter mold growth on wood, plastic, wallboard, sheetmetal, concrete, masonry, black, painted metal and galvanized metal. IAQ 6500 can also be used on new structural materials to help prevent mold growth during building construction.

**MASONRY BLOCK**

Apply one coat of IAQ 3000 block filler if primer. Use IAQ 4000 rust inhibiting direct-to-metal primer. IAQ 6500 is推荐 to be used on new structural materials to help prevent mold growth. IAQ 6500 can also be used on new structural materials to help prevent mold growth during building construction.

**Porous Surfaces**

Apply IAQ 6500 with brush, roller or airless spray equipment.

**Smooth Surfaces**

Spray: .015 to .023 tip @ 1500-3000 P.S.I.

**Roller**

Synthetic fiber 3/8" nap or longer

**Brush**

Synthetic, nylon or polyester bristle
