9000 is a white waterproofing coating that is specially formulated to stop water from penetrating through a variety of interior and exterior surfaces (including above or below grade masonry walls, concrete, terraces, balconies, walkways, basements, and foundations). This latex based formula stops 10 psi of water pressure (greater than a wall of water 22 feet high). IAQ 9000 contains a fungicidal agent to resist mold growth on the surface of the coating. The fast drying formula may be applied with a brush and/or roller on dry surfaces and cleans up easily with soap and water.

**SURFACE PREPARATION**

Wear PPE if you scrape, sand, or remove old paint from any surface; you may risk lead dust. LEAD DUST EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH-approved respirator to protect lead-exposed. Carefully clean up with a wet mop and BVP dust. Before you start, find out how to protect yourself and your family by contacting the U.S. EPA/Lead Information Hotline at 1-800-424-LEAD(5324) or log on to www.epa.gov/lead.

Porous Surfaces:
- Must be free of dust, debris, metal, dirt, glass, paint, oil, glass, tar, mastic, wax, soap and other surface contamination. Clean stained surfaces with IAQ Advanced Peroxide Cleaner, or use any EPA registered antimicrobial disinfectant cleaner such as IAQ 2500, IAQ 2000, IAQ 2500, ShockWave or ShockWaveRTU.
- Patch irregularities with an appropriate patching compound. Efflorescence, a white, powdery crystal-like powder, may be caused by drying concrete or masonry. Efflorescence is not a subsurface contamination. Clean mold stained surfaces with IAQ Advanced Peroxide Cleaner, or use an EPA registered antimicrobial disinfectant cleaner such as IAQ 2500, IAQ 2500, ShockWave or ShockWaveRTU.

**CLEANUP**

Clean up the coatings immediately after use. Use simple soap and water. Do not wash waste into any storm drains. Clean up spills and waste according to all existing local, state, and federal regulations.

**PRECAUTIONS**

Some dry at a temperature at between 40°F (4°C) and 90°F (32°C). 200°F (93°C). Do not mix coating below grade masonry walls, cinder and concrete blocks, or porous wood. IAQ 9000 is a white waterproofing coating that is specially formulated for specific details (Contact Fiberlock for more information). Do not attempt to apply with conventional airless spray equipment due to the abrasive properties of IAQ 9000.

**TINTING**

The colorants have been designed to resist fading and should persist in the light. The coating is dispersed with water and is not suitable for use with other solvents.

**DRYING TIME @ 70°F 50% R.H**
- To Touch: 1 hour
- Recoat: 3 hours

**COVERAGE**

- Smooth Surfaces: 1 gal = 175 sq. ft.
- Porous Surfaces: 1st coat = 175 sq. ft., 2nd coat = 125 sq. ft.

**TINTING**

- May be tinted to light or pastel shades with alkali-proof universal tinting colors. Use only 25% of color normally recommended. Do not use more than 2% wet tinting color per gallon. IAQ 9000 is ideal as a finish coat.

**SURFACE INSTRCTIONS**

- For additional information check Safety Data Sheet (SDS) or Product Data Sheet (PDS) available online at www.fiberlock.com.

**CALCULATED V.O.C.**
- IAQ 9000: 890 g/L
- IAQ 8935: 0 g/L

**WARNING / ATTENTION**

H341 - Causes serious eye irritation.
H351 - Suspected of causing cancer
H361 - Causing of fertility problems in males and females
H302 - Harmful if inhaled.
H370 - Causes damage to fertility.
H360 - Causing of fertility problems in males and females
H360 - Suspected to cause damage to the male reproductive system.
H302 - Harmful if swallowed.
H309 - Harmful if inhaled.
H272 -哪怕性交過敏症
H332 - Causing of fertility problems in males and females
H332 - Suspected to cause damage to the male reproductive system.
H332 - Suspected to cause damage to the female reproductive system.
H350 - Suspected of causing cancer.
H317 - Causes serious eye irritation.
H319 - Causes serious skin irritation.
H319 - Causes serious skin irritation.
H317 - Serious eye irritation.
H319 - Causes serious skin irritation.
H317 - Serious eye irritation.
H319 - Causes serious skin irritation.

Exposure to lead dust can cause serious illness, especially in children. Risk of lead poisoning may increase if you breathe dust or particles containing lead. For more information, contact the U.S. EPA/Lead Information Hotline at 1-800-424-LEAD(5324) or log on to www.epa.gov/lead.

If you have concerns about lead dust, follow the U.S. EPA’s Lead Renovation, Repair, and Painting Rule (RRP) for more information.

**For Professional Use Only**

Professional Results

- Hold back 10 PSI of water pressure
- Tintable
- Latex based formulation
- For interior or exterior use

- 8395-5 White

**NET CONTENTS:** 5 Gallons

**For Technical Information call 800-342-3755**

**DANGER! KEEP OUT OF REACH OF CHILDREN.**

Close container after each use. Store between 40°F-55°F (4°C-13°C)

For additional information check Safety Data Sheet (SDS) or Product Data Sheet (PDS) available online at www.fiberlock.com.

IAQ 8900 is a white waterproofing coating that is specially formulated to stop water from penetrating through a variety of interior and exterior surfaces (including above or below grade masonry walls, concrete, terraces, balconies, walkways, basements, and foundations). This latex based formula stops 10 psi of water pressure (greater than a wall of water 22 feet high). IAQ 9000 contains a fungicidal agent to resist mold growth on the surface of the coating. The fast drying formula may be applied with a brush and/or roller on dry surfaces and cleans up easily with soap and water. Clean up the coatings immediately after use. Use simple soap and water. Do not wash waste into any storm drains. Clean up spills and waste according to all existing local, state, and federal regulations. Some dry at a temperature at between 40°F (4°C) and 90°F (32°C). Do not mix coating below grade masonry walls, cinder and concrete blocks, or porous wood. IAQ 9000 is a white waterproofing coating that is specially formulated for specific details (Contact Fiberlock for more information). Do not attempt to apply with conventional airless spray equipment due to the abrasive properties of IAQ 9000. The colorants have been designed to resist fading and should persist in the light.
