Annette Baker
Fiberlock Technologies, Inc.
150 Dascomb Rd.
Andover, MD 01810-5873

Dear Annette,

We would like to thank you for the opportunity of reviewing your products. After testing the compatibility of our adhesives with the products submitted, we found the A-B-C[®] Off-White (6421), FIBERSET[®] PM White (7470), A-B-C[®] Clear (6422), FIBERSET[®] PM Clear (7475) and Grip-Tack (6408) products to adhere well with the following Roberts/Capitol Adhesives:

TA-380 Clear Thin Spread Vinyl Composition Tile Adhesive
Fast-50 Economy Grade Multi-Purpose Flooring Adhesive
Roberts 2057 Premium Vinyl Composition Tile Adhesive

QEP/Roberts/Capitol certifies that the above adhesives are compatible and provide a suitable surface for glue-down installations with Fiberlock's A-B-C[®] Off-White (6421), FIBERSET[®] PM White (7470), A-B-C[®] Clear (6422), FIBERSET[®] PM Clear (7475) and Grip-Tack (6408) abatement sealers provided that the sealers are completely dry. As with any installation on concrete site conditions and floor preparation must be followed as per specified in CRI 104/105, Standard for Installation of Commercial Carpet – the concrete must be cured, clean, and dry, free of paint, dirt, grease, oil, curing or parting agents, and other contaminants, including sealers that interfere with the bonding of the abatement sealer and adhesive.

Should you have any questions, please don't hesitate to contact me.

Sincerely,

Jennifer Fletcher
Jr. Chemist
