PowerStone™ Plus

Waterborne Acrylic Surface Conditioner

Product Description

PowerStone Plus is a clear, multipurpose, waterborne acrylic primer that provides protection to a large variety of surfaces. This highly alkali resistant coating resists household cleaners, gasoline, oil and efflorescence. PowerStone Plus seals brick, block and poured concrete to reduce water penetration and prevent surface dusting and staining. PowerStone Plus can be applied to both horizontal and vertical surfaces and is ideal for use on concrete, plaster, brick, slate and stucco. Clean metal surfaces of copper and aluminum can be finished with PowerStone Plus to prevent surface oxidation.

Application Information

SURFACE PREPARATION
Remove all surface contaminants including grease, oil, rust, stains, dirt, dust, wax and mortar spatter. New concrete must cure for a minimum of 28 days prior to application of PowerStone Plus. PowerStone Plus is supplied at the proper consistency as packaged to be applied without thinning under normal environmental and application conditions.

APPLICATION TOOLS
Brush: Synthetic, nylon or polyester bristle
Roller: Synthetic fiber 3/8” nap or longer
Spray: .015 to .019 tips

PRODUCT APPLICATION
Apply PowerStone Plus liberally, at full-strength, working the material into the pores of the surface to ensure surface is fully coated. This product is formulated for use on porous surfaces. When applied to non-porous and/or high gloss surfaces running or dripping may occur.

COVERAGE
Smooth Surfaces: 250-300 sq. ft./gal.
Porous Surfaces: 200-250 sq. ft./gal.

DRYING TIME @ 70°F 50% R.H.
To Touch: 1 hour
To Recoat: 2 hours

CLEANUP
Clean up sealer spatters and equipment immediately after use with soapy water. Dispose of all waste according to all existing local, state, and federal regulations.

PRECAUTIONS
Store in a dry place at temperatures between 40°F (4.5°C) and 90°F (32°C). Do not mix with other coatings. Do not apply when air or surface temperatures are below 50° or apply to a damp surface. Not recommended as a sealer on glazed, quarry or other ceramic type tiles. Steel troweled concrete must be etched prior to application of PowerStone Plus to insure adhesion to the concrete. Smooth concrete with a curing membrane or hardener may require abrasion to obtain proper adhesion. When applying with a sprayer, wear a NIOSH approved respirator with any R, P, N or HE filter.

CAUTION!
KEEP OUT OF REACH OF CHILDREN.
Do not take internally.
Close container after each use.
Keep from freezing.
24 hour Emergency “CHEM-TEL” - 800.255.3924

Coverage

- Smooth Surfaces: 250-300 ft²/gal.
- Porous Surfaces: 200-250 ft²/gal.

Drying Times (@ 70 - 77°F, 50% R.H.)

- To Touch: 1 hour
- To Recoat: 2 hours
- Minimum Application Temp: 50°F (10°C)

Available Package Sizes

- 5 gallon containers
