

CLEAN & INSULATE YOUR CRAWLSPACE

ICP Building Solutions Group provides all the chemistry solutions for your crawlspace remediation projects. Moisture problems and air infiltration in your crawlspace could be causing energy inefficiency and living condition issues which creates a sick home. **Take crawlspace projects to the next level with the most complete product line to clean, seal and insulate.**

CLEAN

Thoroughly clean all surfaces with Fiberlock Advanced Peroxide Cleaner or Benefect Atomic Degreaser. Using deep cleaning degreasers and products with foaming / lifting action provides savings of time and labor and provides a clean substrate.

KILL

When mold and mildew are present, disinfect/sanitize surfaces after cleaning with Benefect Decon 30 or Fiberlock Shockwave to kill bacteria and other microbial organisms that remain on the surface after cleaning.

COAT

Protect your investment, prevent the regrowth of mold, and get long lasting protection by painting the area with Fiberlock IAQ 6000 or AfterShock mold resistant and/or fungicidal coatings.

SEAL

The final step to protecting your crawlspace is to stop air infiltration. Using a HandiFoam two-component spray polyurethane foam to completely seal the perimeter and large voids in the crawlspace can help eliminate air penetration.

PART NUMBER & PRODUCT LIST

CLEAN

FIBERLOCK ADVANCED PEROXIDE CLEANER

- Revolutionary hydrogen peroxide-based cleaner
- Aggressively removes stains from mold and mildew on porous, semi-porous, and non-porous materials

***FIBERLOCK HYDROBOOST 8413:** Additive that instantly increases the oxidation potential of Advanced Peroxide Cleaner.

ITEM #8314

BENEFACT ATOMIC DEGREASER

- Botanical, solvent-free, heavy-duty cleaner & degreaser concentrate
- Formulated to seek & remove particulate at the atomic level with minimal agitation

ITEM #80475

KILL

FIBERLOCK SHOCKWAVE CONCENTRATE

- Sanitizer & disinfectant designed for use on various surfaces subjected to microbial contamination (1G = 64G)

ITEM #8310

BENEFACT DECON 30

- Ready-to-use, hospital-grade, & authentically botanical disinfectant and cleaner
- 100% bio-based, EcoLogo certified and is EPA registered for hard surface disinfection against viruses, bacteria and mold

ITEM #20476

COAT

FIBERLOCK AFTERSHOCK

- The ultimate in antimicrobial coatings to handle residual mold and mildew and inhibit future growth
- Recommended for use on interior wall surfaces in residential, commercial, and institutional buildings

ITEM #8390

FIBERLOCK IAQ 6000

- White, tintable mold resistant coating
- Resists mold growth on the dry coating surface

ITEM #8360

INSULATE

HANDIFOAM E84 SPRAY FOAM

- A two-component spray foam system designed to fill and insulate large voids and surfaces and creates a continuous air barrier that completes the building envelope

ITEM (HFO) # P12057, P12058, P12059*

ITEM (HFC) # P10705, P10726, P10762*

*Additional sizes available, visit the website for more information.

HANDIFOAM ONE-COMPONENT

- Moisture-cured and designed to completely fill and seal small gaps, cracks and voids

ITEM # P30107, P30115*

*Additional sizes available, visit the website for more information.
